

Westwood North Water Supply Corporation

6310 Weisinger Drive, Magnolia, Texas 77354
 Direct: (936) 321-7766 / Fax: (936) 273-7766

OFFICE HOURS

The office hours are from 8:00 a.m. to 12:00 p.m. and 1:00 p.m. to 5:00 p.m. The office is closed from 12:00 p.m. to 1:00 p.m. Payments can still be made even though the office is closed; you can place it in the payment box that is located to the left of the front door.

SPECIAL POINTS OF INTEREST:

- Monthly board meetings are held the second Thursday of each month at 7:00 p.m.
- The annual board meeting is held in February each year
- Election of Directors is each year at the annual meeting in February or the first Board meeting in March

BANK DRAFTS

Tired of wondering what day your payment is due? Tired of paying that extra \$10 late fee? Tired of paying that \$40 reconnect fee? Tired of wondering if you have already paid your current bill? STOP WORRYING...sign up for the bank draft program and NEVER worry again. And, the draft program is FREE!

All you have to do is complete the draft form and return it to the office with an attached voided check. The payment is automatically drafted on the 10th of each month. You will still continue to receive a bill for your records. That way, if you have concerns regarding the amount or the usage—give us a call and we will be happy to answer your questions.

WE ARE HERE TO WORK FOR YOU!

ANNUAL MEETING / ELECTION

The annual meeting was held on Saturday, February 8, 2014. If you have not heard the good news yet, Mr. Glenn A. Garig retained his seat on the Board of Directors. So, if you run into Mr. Garig in the community, be sure and congratulate him!

INSIDE THIS ISSUE:

Office Hours	1
Bank Drafts	1
Annual Meeting/Election	1
Water Payments	1
Save 30 Gallons of Water in One Day	1
Board of Directors	2
Preparing Your Lawn for Spring	2

WATER PAYMENTS

When preparing your check or money order for your water bill, PLEASE, do not staple or tape your payment to the envelope, a piece of paper, or your bill stub. Recently, some payments had to be taped back together because of the condition of the payment after removing the staple or tape.

Also, to ensure that the payment is applied to the appropriate account, please write your account number in the memo section of the check/money order because some payments are not from the person named on the account.

Save 30 Gallons of Water in One Day

- Save 5 gallons: Shorten showers by 2 minutes
- Save 5 gallons: Turn off water in between rinsing dishes
- Save 20 gallons: Water lawns in early morning or late evening

BOARD OF DIRECTORS

Glenn A. Garig	President
Ben Bickford	Vice President
Luke Tusing, Jr.	Secretary-Treasurer
Erick Edwards	Director
Billy Riley	Director

TO ENSURE SAFE DRINKING WATER

PREPARING YOUR LAWN FOR SPRING

When the winter season ends, you will probably want to spend more time outside, appreciating the warm weather and the simple pleasures of a nicely kept lawn. Here are a few steps you can take toward creating and maintaining a healthy and gorgeous lawn.

Remove debris

Rake away the debris from the fall and winter months, including leaves and sticks. This will give you a fresh start for the spring. If you have leftover rubbish on the lawn, this can get in the way of mowing, watering, planting seed and so on. Raking has the added benefit of loosening the surface of the soil, encouraging healthy airflow.

Chris Lemcke, national technical director of Weed Man (a lawn care company), advises raking up last year's leaves and matted grass that were hiding under last fall's leaves and sticks left in the yard. This can keep the thatch level at half an inch or less. It will also allow you to care for the lawn properly.

Apply more grass seed

Look for areas with weak grass growth or dead grass. Use a strong rake to open the surface. Mix the grass seed with new, healthy soil. Then spread this soil/grass seed mixture over the surface. Don't forget to regularly water this area to foster hearty and fast grass growth.

Mulch

Mulch is a protective covering that you can apply to soil to lock in moisture. "Mulching with a depth of 2 to 4 inches around the bases of trees, shrubs and in flower beds will retain water and keep plants warm," says Lemcke.

Water deeply

Many homeowners water their lawns often -- but with little water. However, it's better to water only when your lawn needs it with a lot of water.

If you water deep and sparingly, you will train the grass roots to dig deeper into the soil. Whereas, if you water lightly and often, you will train the roots to stay near the surface, according to the Environmental Protection Agency.

Mow high

Mow your lawn with a sharp blade. You should also mow often because grass doesn't adjust as well to infrequent mowing. If you keep your grass a bit on the longer side, it will grow thicker and healthier, with a better-established root system.

Better roots help your grass survive insects or drought. According to the Environmental Protection Agency, many turf grass species should be kept between 2 1/2 to 3 1/2 inches.
